ar file. You will be prompted to download the latest file which is the uRight-Multy™ v.5.1[^1]. Now uRight-Multy™ is installed and ready to use. !
[In the IFE, the button "install" appears.][{ data-label="install"}](figure.png){width="\textwidth"}
User Interface ===== In this section, we provide details about the interface of uRight-Multy™. A screenshot is given in Figure \[Screenshot\]. The corresponding code is included in the ****README**** file. If a file is needed by uRight-Multy™, a button with a gear will be displayed in the right upper corner of the user interface. By clicking on this button, a new window will be displayed with a directory path, where the file is located. If the file is not found in that directory, a button will appear. This button leads to a message: - If the “look for specific files” is checked, the IFE will look for a specific file, in the same way as a web browser. - If the “unpacked files in the directory” is checked, a list of subdirectories will be displayed. From the directory uRight-Multy™ was installed, the subdirectory uRight-Multy™/content/ “unpacked files” contains all the files needed to run uRight-Multy™. - If the “attempt to move to the directory” is checked, a Windows explorer will appear in a new window, where the directory with all necessary files is displayed. The file or folder (depending on the type of file) with the name “uRight-Multy” is moved into this directory.
